The PARKPLUS QP1000 Quad Stacker is a 4-post, 4-level vehicle lift for parking cars one above another. The QP1000 raises and locks three platforms in place allowing a fourth vehicle to be parked at grade.

Entire assembly comes pre-welded and is assembled in the field. Stackers may be installed as single units or in arrays with shared common legs. Stacker is designed to be mounted on grade with an engineered foundation. Stacker may be installed indoors provided floor is certified to support the weight.

The PARKPLUS QP1000 Quad Stacker is designed to be installed both indoors and outdoors. Platform height is set at fixed height per project specification between 0'-6" min. and 7'-0" max. Each city may have minimum height requirements and different clear requirements for code required parking. Owner/architect should review with local planning and building departments. MEP coordination with project team must meet code requirements and satisfy equipment clearances.

Suitable for
- Standard passenger vehicles
- SUVs
- *Custom solutions for vans, RVs and boats

Specifications
- Load per Platform: 6,000 lbs.
- Weight of Unit: *~10,000 lbs.
- Length of Platform: 15'-0"
- Length incl. Overhang: 16'-6" to 18'-0"
- Width of Unit: 8'-6" to 9'-0"
- Height of Unit: 26'-7" to 32'-7"
- Operation: Hydraulic
- Central: Push Button Control
- *Custom Height and Width Available

Power Pack
Hydraulic Power System (HPS)
HPS-320: 1-10 units
(208-230V / 3 PH / 60 HZ / 20 HP / 60 FLA)

Electrical
1 Disconnect required per HPS
3 PH 208-230V / 80Amp
All control wiring is a Class 2 Circuit 24V

Layout
PARKPLUS QP1000 Quad Stacker can be arranged in single or tandem arrays on either side of a drive aisle. Queuing space of at least 3 vehicles must be provided to allow for shuffling of cars. Queuing space may be in drive aisle. For commercial projects, during peak traffic, all platforms will be lowered for quick filling and emptying.

Components
1) PLATFORMS
2) LOCKING MECHANISM
3) HYDRAULIC CYLINDER
4) REAR LEG ASSEMBLY
5) FRONT LEG ASSEMBLY
6) SEISMIC MOMENT FRAME*
7) PUSH BUTTON CONTROLS
8) EMBEDDED ANCHOR BOLTS

* Required in seismic zones

Applications
QP1000 Quad Stacker can be installed in attended/valve applications:
- Multi-Family Residential Buildings
- Indoor & Outdoor Installations
- Low & High Rise Buildings
- Commercial Buildings
- Surface Lots

ADDITIONAL INFORMATION

Safety
Device is equipped with safety locking system. The safety hook system holds full weight of vehicle on platform in locked position. Device is equipped with a secondary (anti-fall) safety system. Device can be equipped with individual keyed controller for extra safety. Self-attended applications may require additional sensors to detect objects located under platform or entering the area below platform.

Fire Protection
In most metropolitan areas, car stackers are reviewed as similar to high piled storage and non-building structures. Fire rating of structural components is not required. Sprinklers may be required per following section. Each city may have fire department guidelines.

Fire Sprinklers
Outdoor: 1. Most cities do not require fire sprinklers. 2. May need to conform to additional zoning regulations and building code requirements.

- Indoor: 1. Installation shall be in a sprinklered garage. In tandem array, additional sprinkler requirements may apply. 2. Sprinkler Plans filed and approved by local municipality. 3. Sprinkler system designed as required by NFPA 13 and local building codes. 4. Clear building height within parking area must accommodate height of equipment plus additional requirements for adequate coverage of fire sprinklers.

Temperature
Device is designed to operate between 20° and 120° F. For below freezing environments, hydraulic heaters for Power Packs are recommended.

Loading
Structural design and loading is provided on a project by project basis and is dependent on seismic zones, soil conditions and other environmental conditions.

Warranty

Service
At end of 12-month warranty period a service contract is available upon request. Rental option may include Service & Maintenance for full term.

Approvals
- MEA/OTCR Certified. City of New York
- LAETL in Approval, LARRP Pending, City of Los Angeles
- California Seismic Code Compliant
- Miami Dade County Compliant
- Approved in Multiple U.S. Cities
